### **DETAILED ACTION**

This office action is in response to applicants' communication filed on 4/6/04.

It **appears** that claims 1, 3-27 are pending in this application. Claim 2 has been canceled.

Claims 12, 19, 21 and 23 are **missing from the amended** claims.

#### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1 and 3-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

At the outset claim 12 is missing. Claim 1 defined M and L1, but these two elements are missing from the formula, thus rendering the claims indefinite.

#### ***Claim Rejections - 35 USC § 103***

3. Claims 1 and 3-11 and 20, 22, 24-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Minami et al.

Minami et al teach structurally similar compounds as claimed herein, see column 4, lines 10-25, wherein Z can be O, S, CH<sub>2</sub>, NH etc and X can be alkoxy similar to herein.

Applicants argue that amendment to the definition of L1 when phenyl renders the rejection moot, is not convincing. Inasmuch as the substituents are similar, pKa is going to be similar, absent evidence to the contrary.

Art Unit: 1621

4. Claims 1, 3-11, 14-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Widdowson(WO 96/25157).

Applicants argue that pKa of formula I is greater than 10, whereas, the reference teaches that pKa is less than 10. Applicants have not shown unexpected results due to pKa of 10 and 11, and one of ordinary skill in the art would have obtained pKa of 11 or 9, under routine experimentation, especially since the ionizable groups in herein and in the reference are similar. As to the positional isomeric situation, applicants' arguments are not persuasive, inasmuch as the positional isomers are prima facie obvious as a whole absent evidence to the contrary. Ex parte Mowry (POBA 1950) 91 USPQ 219. Finally, applicants argue that the reference does not teach treatment of cancer. The examiner disagrees. See page 89, line 25.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 1621

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
